# Getting Building Codes Right

Sharing best-practice experience on

**“how to”**

practically develop and implement  
state of the art  
building energy codes.

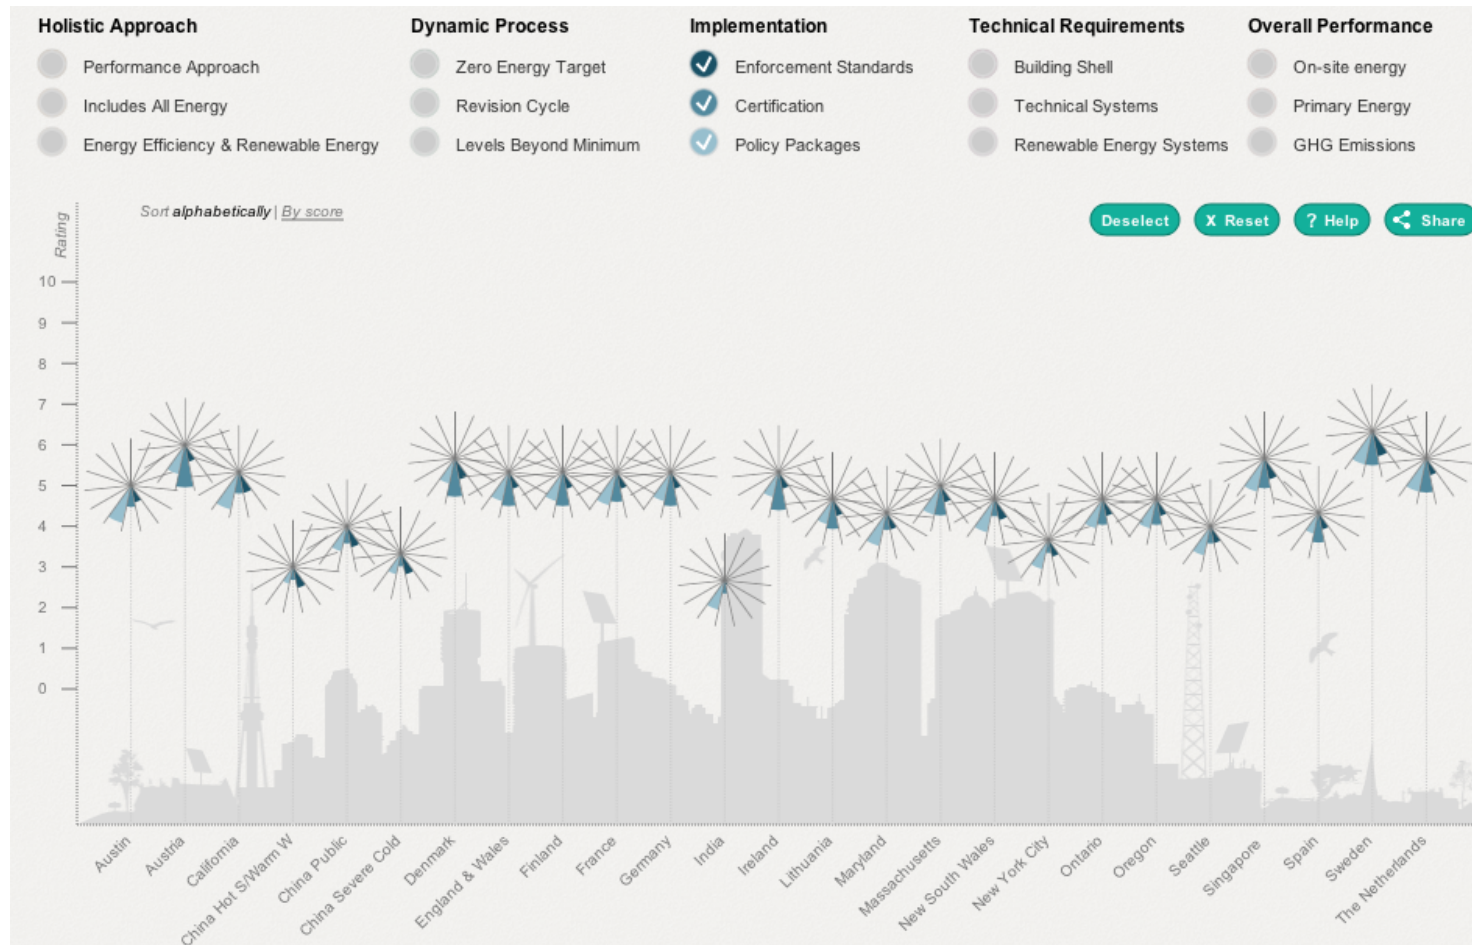

1. The importance of long term targets & frequent revision cycles.
2. Lessons learnt on the road to performance based building energy codes.
- 3. Enforcement – Learning from best practice experiences.**

**Recordings available at  
[www.gbpn.org](http://www.gbpn.org)**

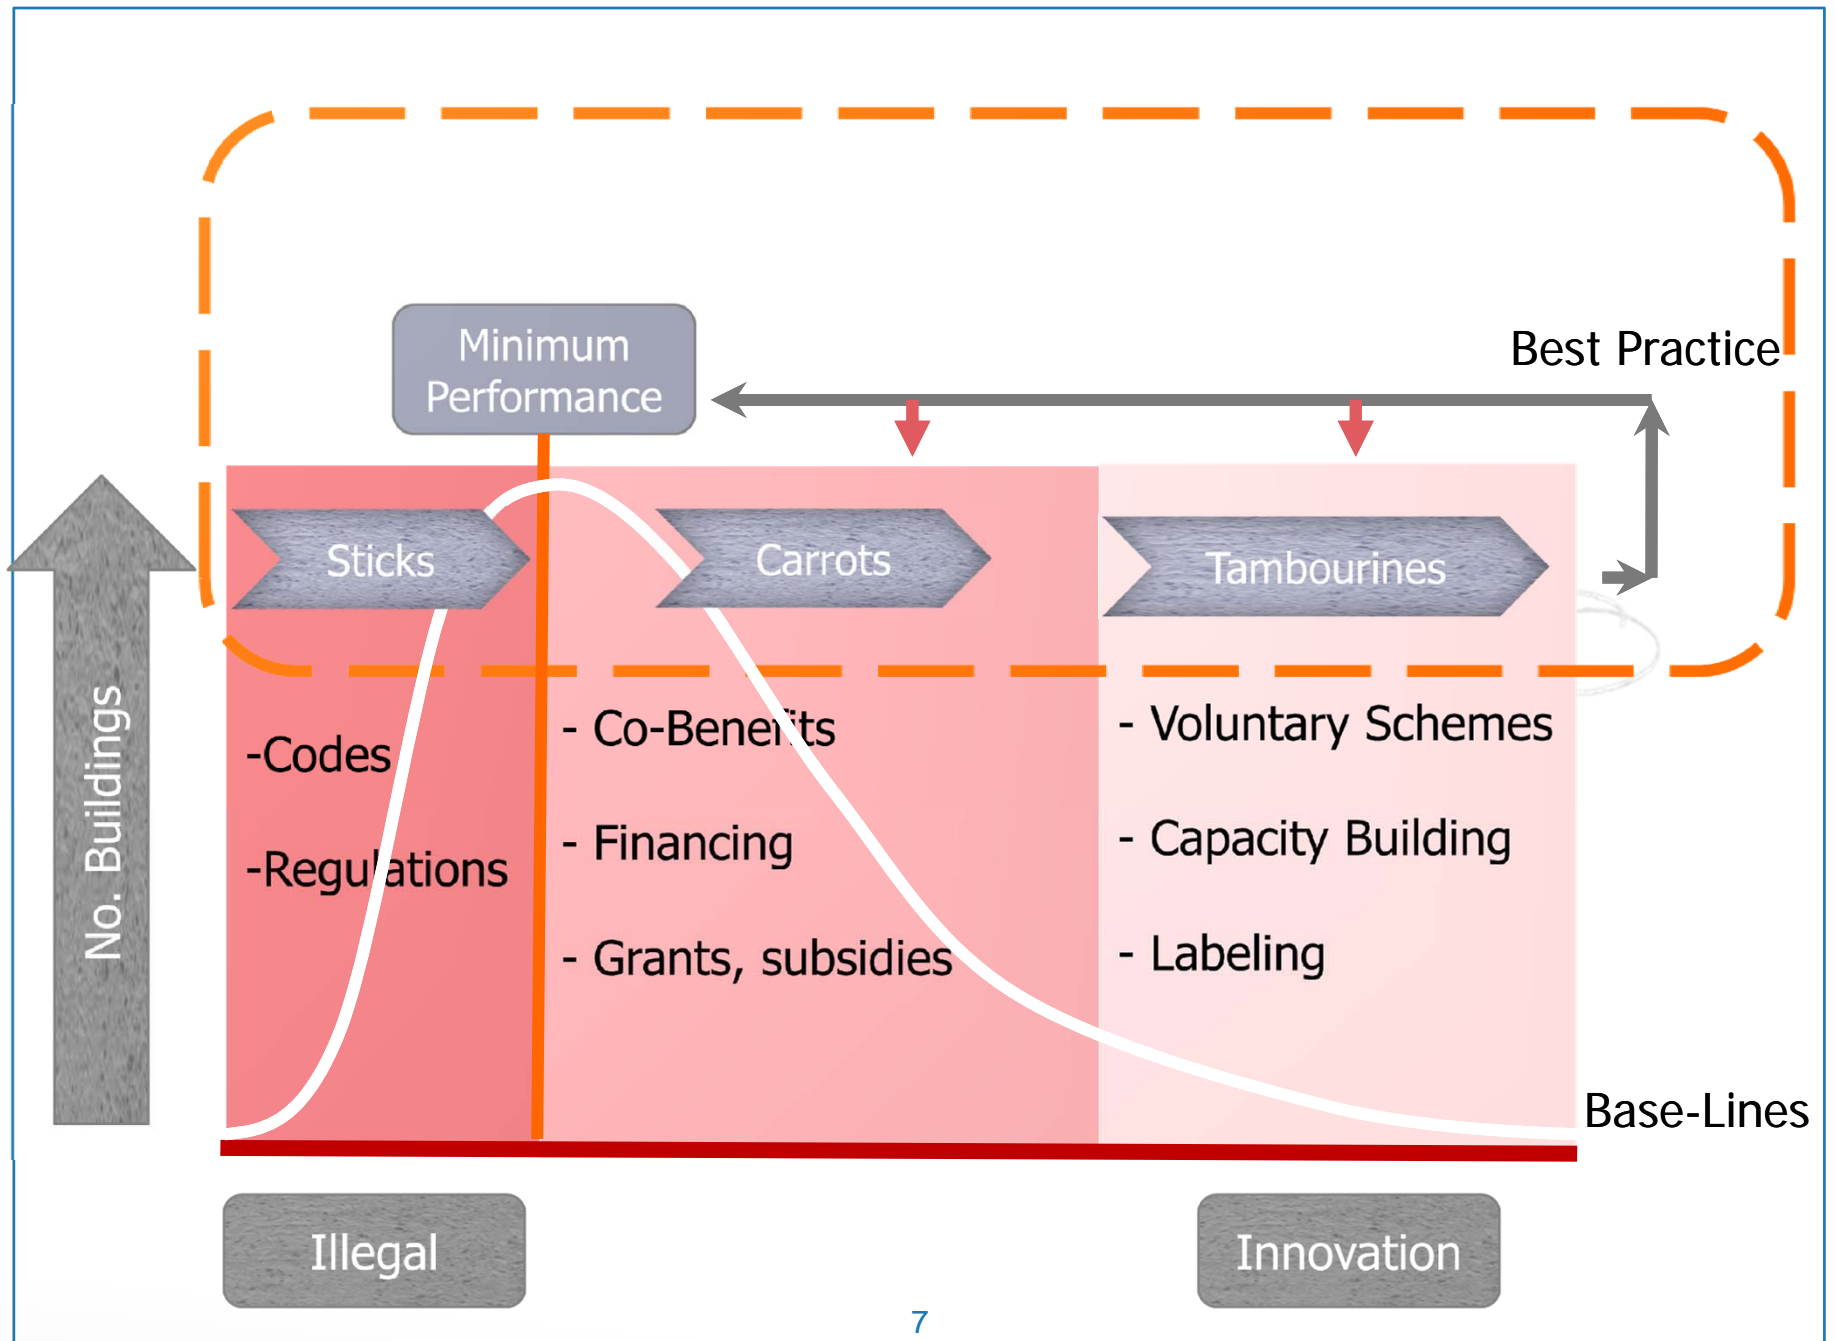

# GBPN Policy Comparative Tool

# Prescriptive → Performance Based Building Energy Codes

- More frequent revision cycles
- More technically demanding building codes
- How are these changes reflected in compliance regimes?
  - What models for enforcement are being used?
  - What financing measures are in place to support and improve compliance and enforcement?
  - Are education and awareness raising campaigns/measures in place (e.g. energy rating)
  - Is actual energy consumption taken into consideration?
