

Energizing Equality

The importance of integrating gender equality principles in national energy policies and frameworks

Ana Rojas
Senior Gender and Energy Consultant
Nedworc Foundation

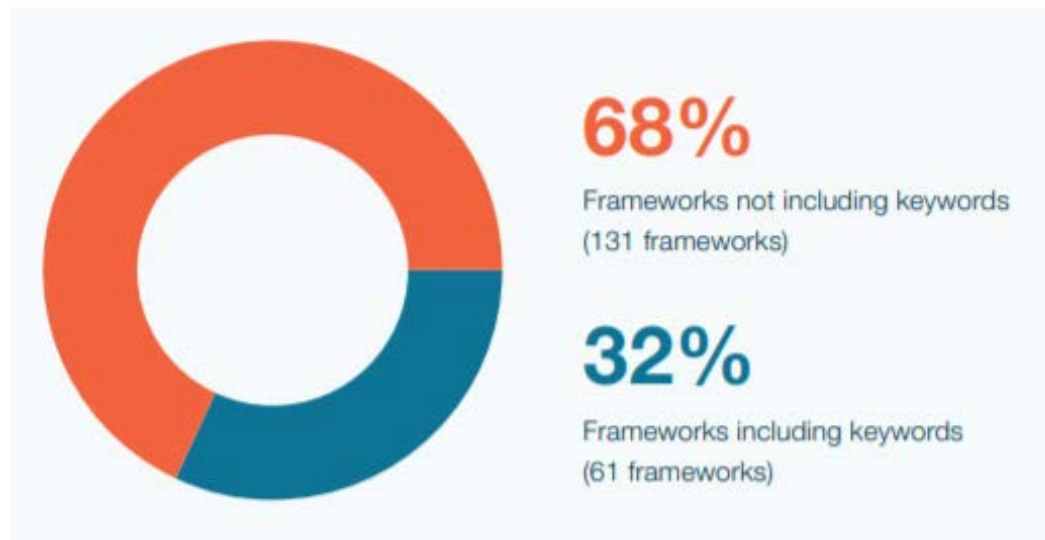

Methods

- To what extent is gender being mainstreamed in energy policies and other policy frameworks at the national level?
- IUCN GGO's gender keyword dictionary was used to identify keyword mentions in frameworks:
 - *gender, sex, female, woman, women, girl, equity and equality*
- The keywords were **analyzed for context**, to identify the ways in which gender has been characterized in each framework

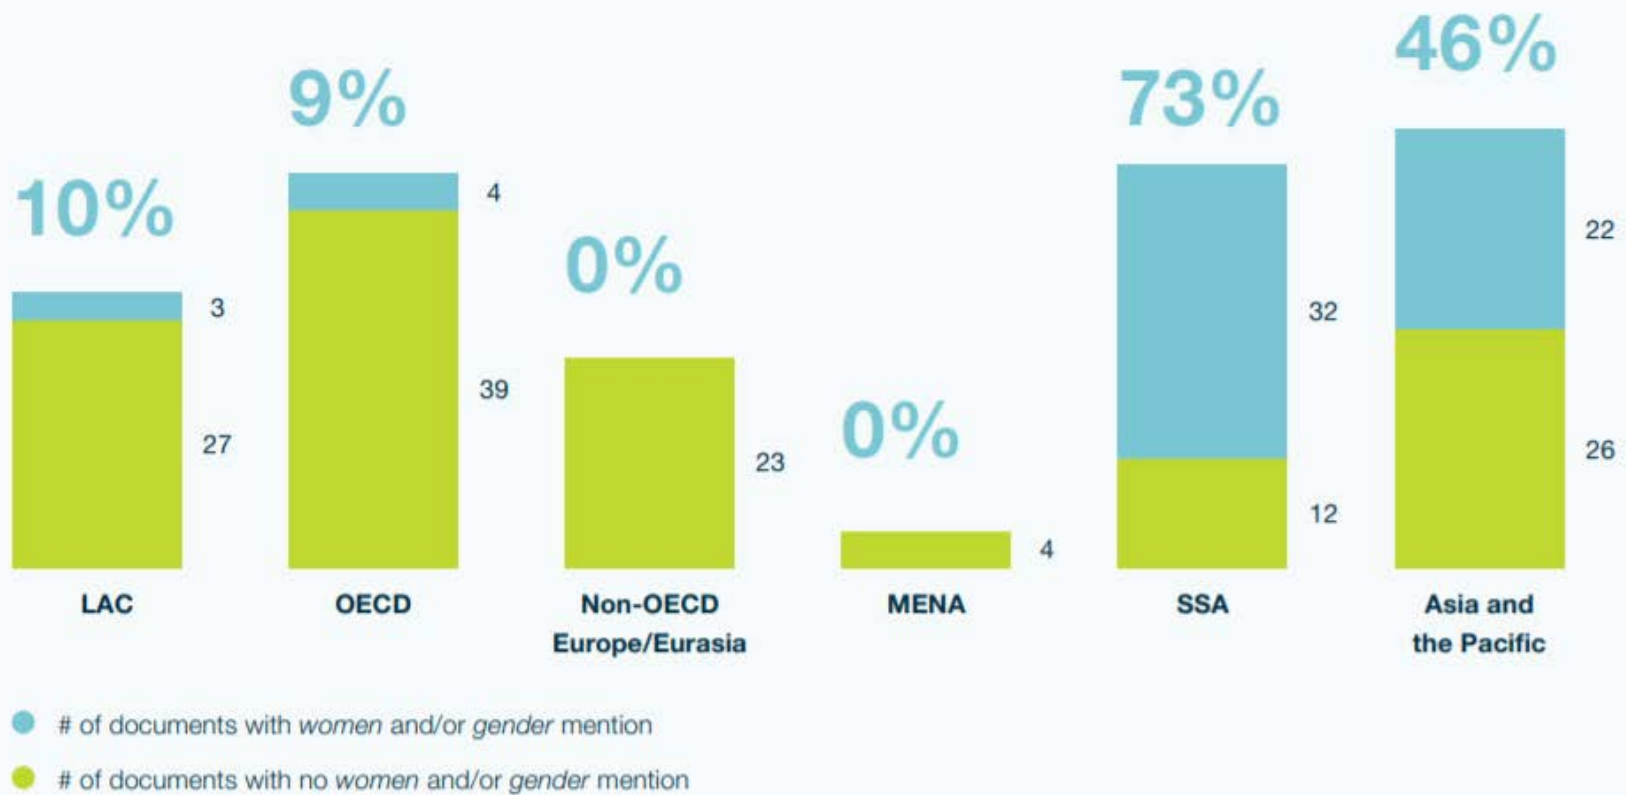

Key Findings

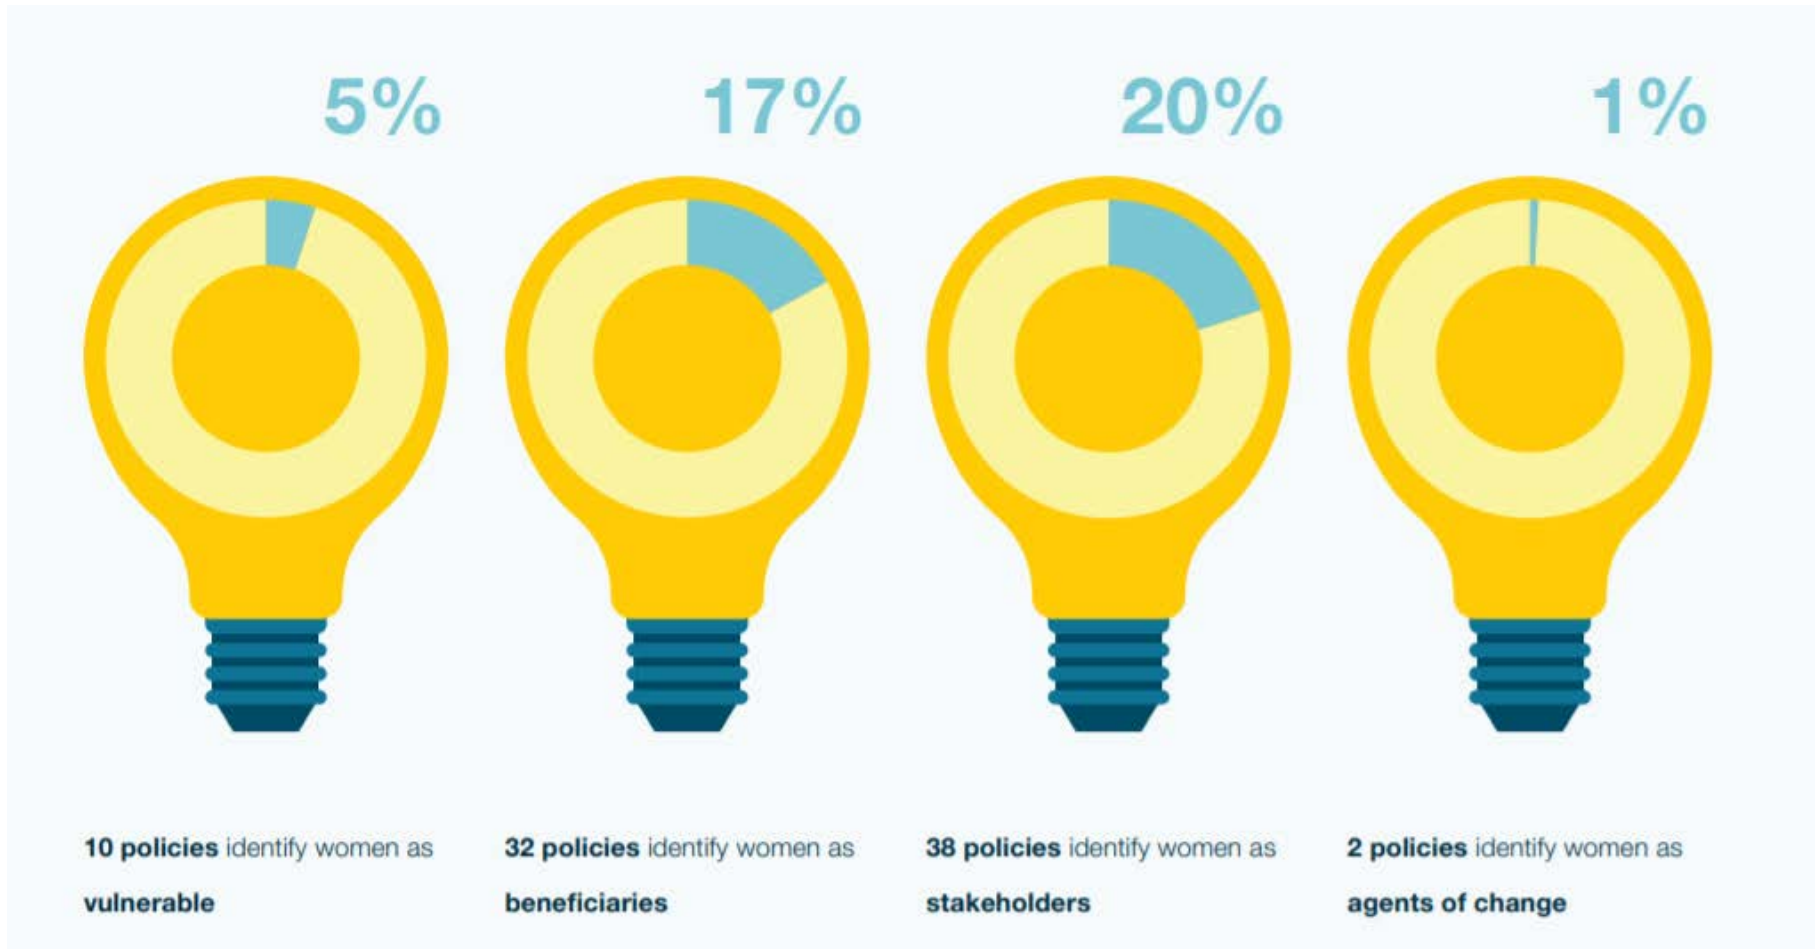

From a sample of **192 documents** from 137 countries, **nearly one-third** of national energy frameworks include gender considerations to some extent.

Regional Comparison National Energy Frameworks

Characterization of Women

Gender-Energy Nexus

Powering Forward

- Research and document the **motivation** for mainstreaming gender in energy policies
- Identify **enabling conditions** for countries to mainstream gender into their national frameworks
- **Map** the extent to which gender objectives of the energy policies are set into **action**
- Build on lessons of the traditional energy sector to advance research, build capacity and advocacy to propel an equitable, sustainable and gender-responsive **renewable energy sector**
