# Patrick Criqui, Emeritus Researcher, The National Center for Scientific Research

Patrick CRIQUI (*HEC-75*) is an emeritus researcher at CNRS, working on the economics of energy transition and climate policies at University of Grenoble-Alpes. His research has initially explored the economics of solar energy and the modelling of international energy markets. He then developed a world long term energy model, POLES, which is currently used by the European Commission and by different administrations and companies in Europe to analyse the economics of climate policies. He has been a lead author in IPCC's Working Group 3 (collective Nobel Peace Prize in 2007). He is member of the Economic Council for Sustainable Development by the French Minister of Ecology and of the Expert Committee for the Energy Transition, in charge of the monitoring of the National Low Carbon Strategy and Plurennial Programming for Energy.
