

# RENEWABLES 2018

## GLOBAL STATUS REPORT

**Hannah E. Murdock**  
Project Manager & Analyst  
REN21

Renewables in Heating, Cooling, & Transport  
Clean Energy Solutions Center Webinar  
21 June 2018

2018

# REN21 is a global multi stakeholder network dedicated to the rapid uptake of renewable energy worldwide.

## NGOs:

CAN, CEEW, FER, GACC, GFSE, Greenpeace International, ICLEI, ISEP, MFC, SLoCaT, REI, WCRE, WFC, WRI, WWF

## Industry Associations:

ARE, ACORE, ALER, APREN, CREIA, CEC, EREF, GOGLA, GSC, GWEC, IREF, IGA, IHA, RES4MED, WBA, WWEA

## Science & Academia:

Fundacion Bariloche, IIASA, ISES, NREL, SANEDI, TERI

## International Organisations:

ADB, APERC, ECREEE, EC, GEF, IEA, IEC, IRENA, RCREEE, UNDP, UN Environment, UNIDO, World Bank

## National Governments:

Afghanistan, Brazil, Denmark, Germany, India, Norway, South Africa, Spain, UAE, USA

# Renewables Global Status Report

**Collaborative annual reporting since 2005 building on international expert community. The report features:**

- 01.** Global Overview
- 02.** Policy Landscape
- 03.** Market & Industry Trends
- 04.** Distributed Renewables for Energy Access
- 05.** Investment Flows
- 06.** Energy Systems Integration and Enabling Technologies
- 07.** Energy Efficiency
- 08.** Feature: Corporate Sourcing of Renewables

## REN21 COMMUNITY INVOLVEMENT IN GSR:

  
**60%** new experts in the community every year

  
**40%** have been involved at least twice

  
Over **900** experts internationally

  
**400** experts actively involved in 2018 edition

# Another Extraordinary Year for Renewable Energy

- **Total global capacity:** up almost **9%** compared to 2016, **2,195 GW** at year's end (**1,081 GW** not incl. hydro)
- Share in **newly installed renewable power capacity:**
  - Solar PV: 55%
  - Wind: 29%
  - Hydropower: 11%
  - Bio-power: 4.6%

## RENEWABLE ENERGY INDICATORS 2017

		2016	2017
<b>INVESTMENT</b>			
New investment (annual) in renewable power and fuels <sup>1</sup>	billion USD	274	<b>279.8</b>
<b>POWER</b>			
Renewable power capacity (including hydro)	GW	2,017	<b>2,195</b>
Renewable power capacity (not including hydro)	GW	922	<b>1,081</b>
 Hydropower capacity <sup>2</sup>	GW	1,095	<b>1,114</b>
 Bio-power capacity	GW	114	<b>122</b>
 Bio-power generation (annual)	TWh	501	<b>555</b>
 Geothermal power capacity	GW	12.1	<b>12.8</b>
 Solar PV capacity <sup>3</sup>	GW	303	<b>402</b>
 Concentrating solar thermal power (CSP) capacity	GW	4.8	<b>4.9</b>
 Wind power capacity	GW	487	<b>539</b>
 Ocean energy capacity	GW	0.5	<b>0.5</b>
<b>HEAT</b>			
 Solar hot water capacity <sup>4</sup>	GW <sub>th</sub>	456	<b>472</b>
<b>TRANSPORT</b>			
 Ethanol production (annual)	billion litres	103	<b>106</b>
 FAME biodiesel production (annual)	billion litres	31	<b>31</b>
 HVO production (annual)	billion litres	5.9	<b>6.5</b>

**REN21** RENEWABLES 2018 GLOBAL STATUS REPORT

# Global Investment in Renewable Energy

→ Global new investment in renewable power and fuels in 2017: **USD 279.8 billion (+2%)** (USD 319.8 billion incl. large hydropower)

→ **Developing and emerging countries** invested more than developed countries for the third year running

Global New Investment in Renewable Power and Fuels in Developed, Emerging and Developing Countries, 2007-2017

Source: BNEF

**REN21** RENEWABLES 2018 GLOBAL STATUS REPORT

# Global Investment in New Power Capacity

- Overall, **renewable energy** accounted for about **68%** of the total amount committed to **new power-generating capacity** in 2017
- Investment in new renewable power capacity was roughly **three times** new fossil fuel capacity and more than **twice** the investment in fossil fuel and nuclear combined

Global Investment in New Power Capacity, by Type (Renewables, Fossil Fuels and Nuclear Power), 2017

Source: BNEF

**REN21** RENEWABLES 2018 GLOBAL STATUS REPORT

# Renewable Energy in Total Final Energy Consumption

→ As of **2016**, renewable energy provided **18.2%** (est.) of **global final energy consumption**

- **10.4% modern renewables** (+0.2% compared to 2015)
- **7.8% traditional biomass** (-2.4% than 2015)

Estimated Renewable Share of Total Final Energy Consumption, 2016

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Power Sector

- In 2017, renewables accounted for: **70% of net additions** to global power generation capacity
- Providing **26.5%** of global electricity demand
- **Progress in the power sector shows that the transition to renewable energy is possible!**

Estimated Renewable Energy Share of Global Electricity Production, End-2017

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Global Renewable Power Capacity

**REN21** Renewable Energy  
Policy Network  
for the 21st Century

# Heating and Cooling

- Modern RE share in heating and cooling: **10.3%**
- **Deployment of renewable technologies in H&C** still constrained by: **low fossil fuel prices** and **lack of policy support**
- Majority of **renewable heat** supplied by: **traditional biomass**, with smaller contributions from **modern renewables**, incl. **solar thermal** and **geothermal** energy

Shares of Bioenergy in Total Final Energy Consumption, Overall and by End-Use Sector, 2016

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Geothermal Power Capacity Additions

- **0.7 GW** of new geothermal power generating capacity online in 2017
- Global total: **12.8 GW**
- **Indonesia and Turkey** continued in the lead for new installations (three-quarters of the new capacity)

Geothermal Power Capacity Global Additions, Share by Country, 2017

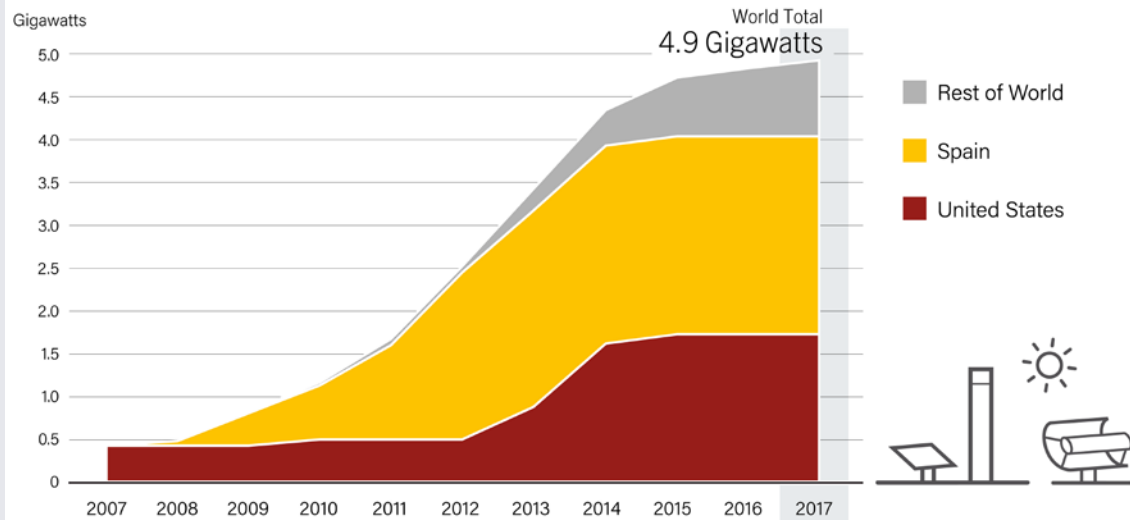

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Concentrating Solar Thermal Power (CSP)

- **100 MW** of capacity came online in 2017; global capacity: **4.9 GW**
- Several projects that were due to enter operation during the year were delayed until 2018 and later
- Global capacity increased by just over **2%**
- Pipeline of about **2 GW** of projects **under construction** (particularly in China and in the Middle East and North Africa region)

Concentrating Solar Thermal Power Global Capacity, by Country and Region, 2007-2017

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Solar Water Heating Collectors

- **35 GWth** capacity of glazed (flat plate and vacuum tube technology) and unglazed collectors **newly commissioned** in 2017
- Total global capacity: **472 GWth** by year-end
- Gross additions for the year **down 3%** from 36.2 GWth in 2016

Solar Water Heating Collectors Global Capacity, 2007-2017

Source: IEA SHC

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

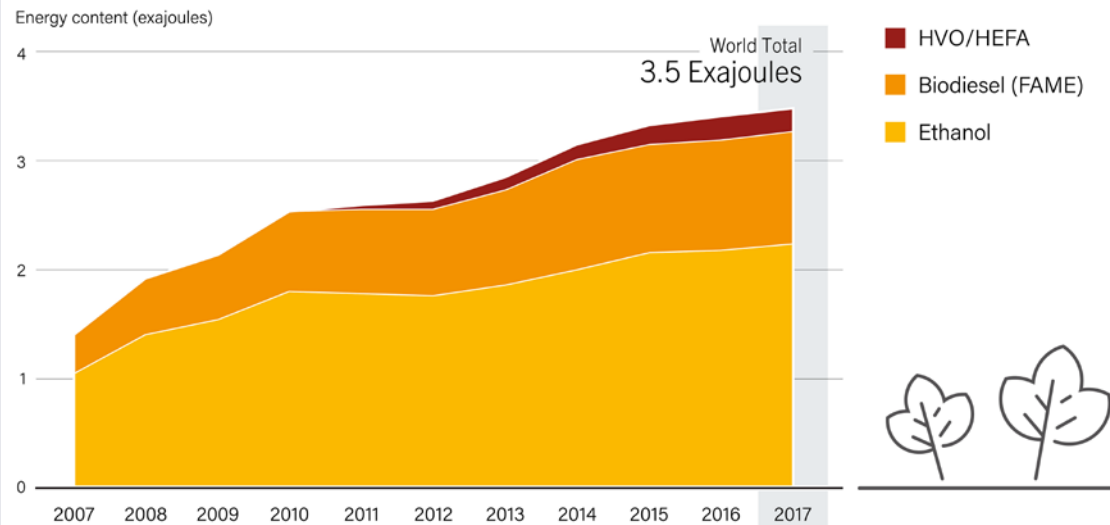

# Transport – Biofuels

- Share of renewable energy in transport: **3.1%** mainly provided by biofuels (90%)
- In 2017, **global biofuels production** increased nearly **2.5%**, to **143 billion litres**
- Biofuels production and use are very **concentrated geographically**, > **80%** production takes place in the **United States, Brazil and the EU**

Global Trends in Ethanol, Biodiesel and HVO/HEFA Production, 2007-2017

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Transport – EVs

## → Electrification trend:

- Rail and light rail
- EVs on the road passed the 3 million mark in 2017 (+70%, but only 1% of light vehicle market)

→ Potential to create a **new market for renewable energy** and facilitate the **integration of higher shares of VRE**

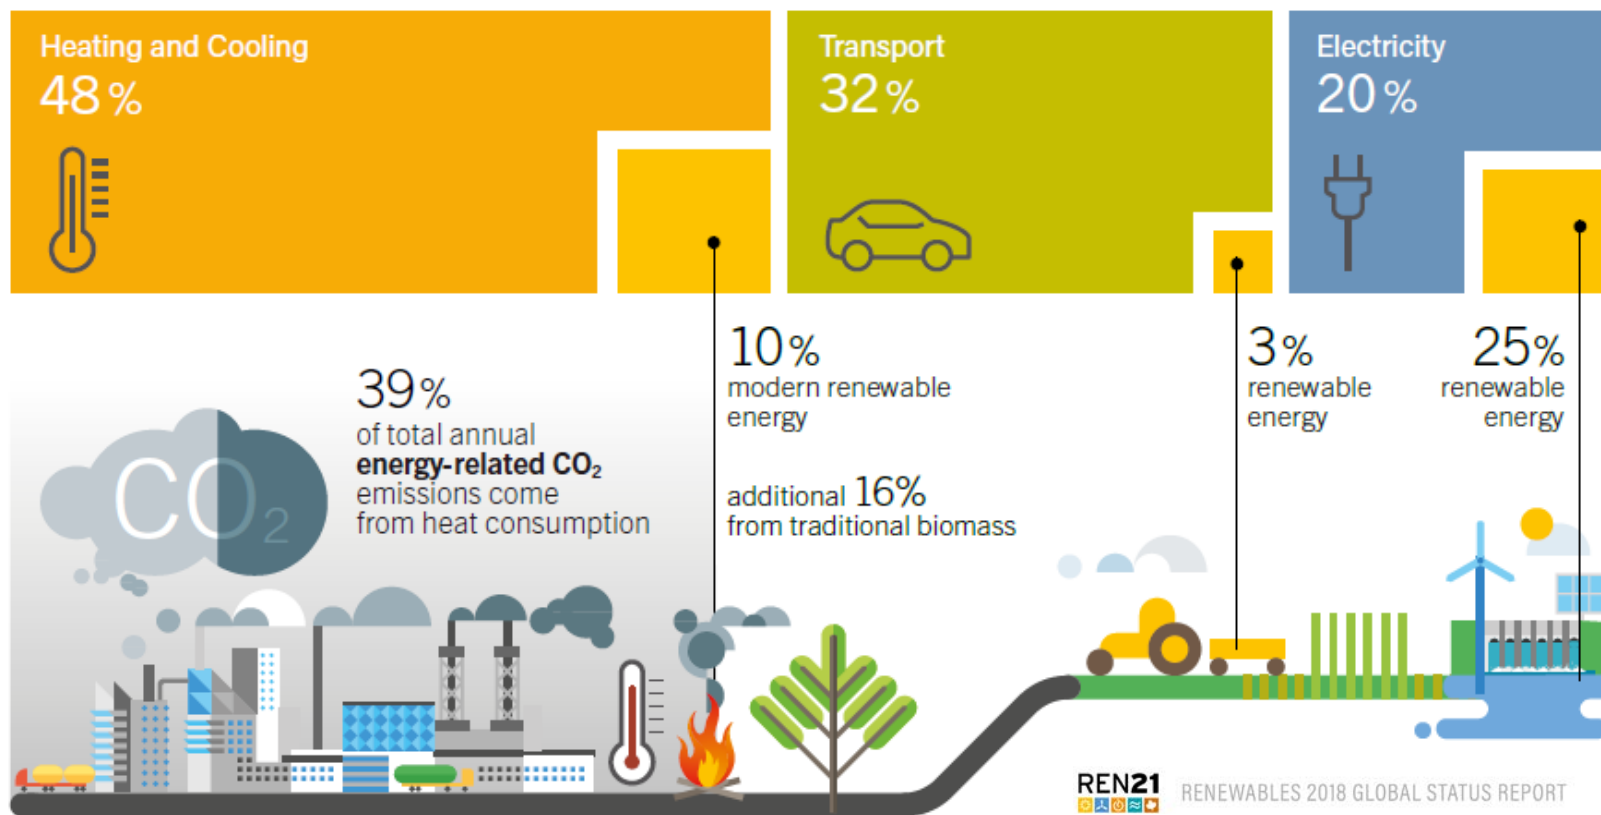

Global Passenger Electric Vehicle Market (including PHEVs), 2012-2017

# The “Sectoral Disconnect”

## ■ WE CONSUME THE MOST ENERGY FOR HEATING, COOLING, AND TRANSPORT

Modern Renewable Energy in Final Energy Use by Sector, 2015

# The “Sectoral Disconnect”

Renewable Energy in Total Final Energy Consumption, by Sector, 2015

**REN21** RENEWABLES 2018 GLOBAL STATUS REPORT

# Renewable Energy Targets

National Sector-Specific Targets for Share of Renewable Energy by a Specific Year, by Sector, in Place at End-2017

## HEATING AND COOLING

● = one target 

Targets for share of heating and cooling from renewable sources in %

## TRANSPORT

● = one target 

Targets for share of transport energy from renewable sources in %

Most national targets focus on the power sector, where the level of ambition is typically higher than for heating and cooling and for transport.

48 countries have national targets for renewable energy in heating and cooling.

42 countries have national targets for renewable energy in transport.

## POWER

● = one target 

Targets for share of electricity generation from renewable sources in %

146 countries have national targets for renewable energy in power.

# Carbon Pricing Policies

→ Carbon pricing policies were in place in **64 jurisdictions** worldwide in 2017

Carbon Pricing Policies, 2017

## NATIONAL POLICIES

## SUB-NATIONAL POLICIES

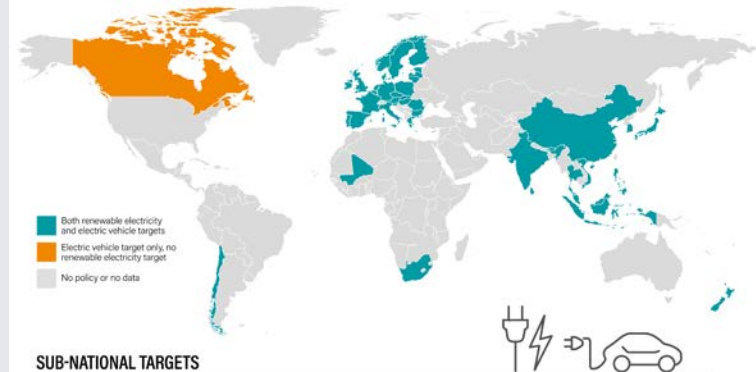

# Sector Coupling: Targets for RE and EVs

- Limited examples of **policies that encourage/mandate the use of renewable energy in EVs (Austria and Germany)**
- Countries with **targets for both EVs and renewable energy in power** may encourage the use of renewable deployment in transport
- Governments also are supporting EVs through **public procurement**

Targets for Renewable Power and/or Electric Vehicles, End-2017

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Corporate Sourcing of Renewable Energy

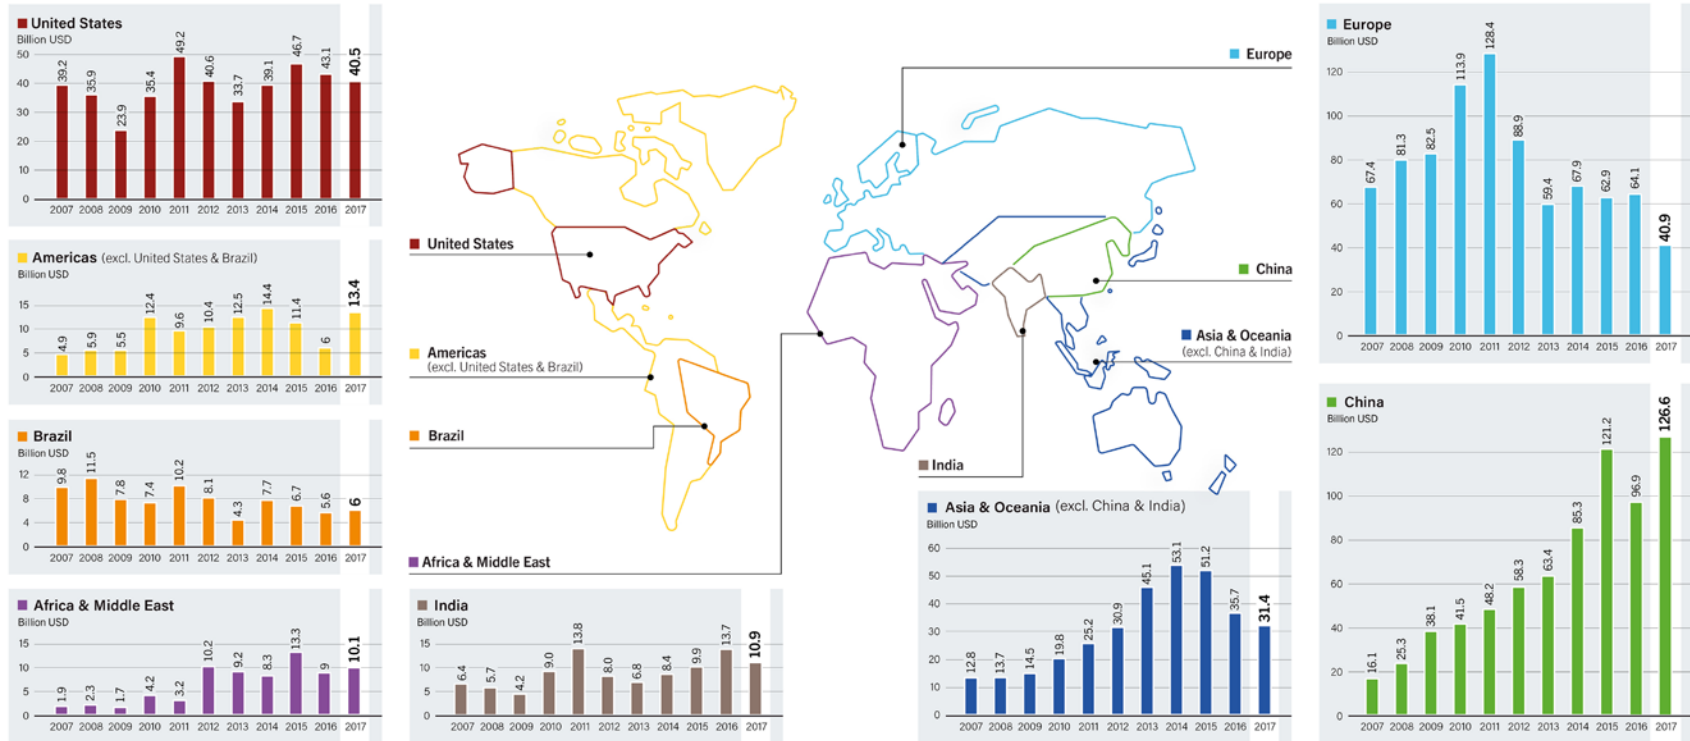

- As of end-2017, corporations had actively sourced **465 TWh** of renewable electricity across **75 countries**
- **The IT sector** purchased the largest amounts of renewable energy through **wind power and solar PV PPAs**
- **130 corporations** joined the **RE100 initiative**

Countries Where Corporations Have Sourced Renewable Electricity, up to End-2017

# Investment in Renewable Energy

# Renewable Energy “Champions”

## TOP 5 COUNTRIES 2017

### Annual Investment / Net Capacity Additions / Production in 2017

	1	2	3	4	5
Investment in renewable power and fuels (not including hydro over 50 MW)	<b>China</b>	United States	Japan	India	Germany
Investment in renewable power and fuels per unit GDP <sup>1</sup>	<b>Marshall Islands</b>	Rwanda	Solomon Islands	Guinea-Bissau	Serbia
 Geothermal power capacity	<b>Turkey</b>	Indonesia	Chile	Iceland	Honduras
 Hydropower capacity	<b>China</b>	Brazil	India	Angola	Turkey
 Solar PV capacity	<b>China</b>	United States	India	Japan	Turkey
 Concentrating solar thermal power (CSP) capacity <sup>2</sup>	<b>South Africa</b>	-	-	-	-
 Wind power capacity	<b>China</b>	United States	Germany	United Kingdom	India
 Solar water heating capacity	<b>China</b>	Turkey	India	Brazil	United States
 Biodiesel production	<b>United States</b>	Brazil	Germany	Argentina	Indonesia
 Ethanol production	<b>United States</b>	Brazil	China	Canada	Thailand

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Distributed Renewables for Energy Access

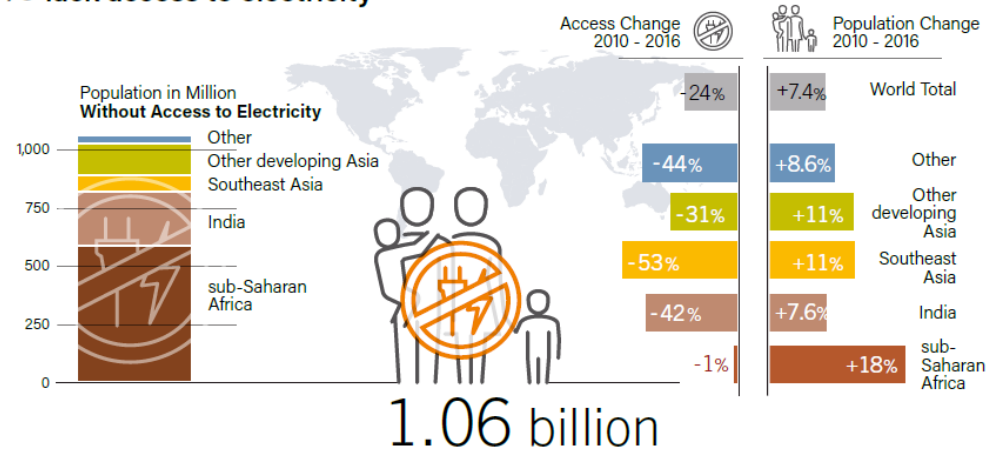

→ In 2016:

- ~14% of the global population lived **without electricity** – approx. 1.06 billion people
- **38%** of the global population lived **without access to clean cooking facilities** – 2.8 billion people
- **DREA systems** were serving ~**360 million people by end-2016**

**WE MUST ACCELERATE RENEWABLES DEPLOYMENT TO REACH UNIVERSAL ELECTRICITY ACCESS IN 2030**

14% of the global population still lack access to electricity

Renewable energy is already a reality in developing countries...

266 GW  
grid-connected renewable power capacity

Distributed renewable energy systems power  
360 million people

RENEWABLES 2018 GLOBAL STATUS REPORT

# Growth in Renewable Energy

→ Overall share of renewable energy has increased only modestly, due to:

- ↗ energy demand
- slow ↘ traditional biomass
- ↗ fossil and nuclear fuel

→ Energy-related CO<sub>2</sub> emissions rose for the 1<sup>st</sup> time in 4 years

Growth in Global Renewable Energy Compared to Total Final Energy Consumption (TFEC), 2005-2015

Source: IEA

REN21 RENEWABLES 2018 GLOBAL STATUS REPORT

# Conclusions

- Global renewable power transition advancing with record capacity additions and rapidly falling costs – **The transition is possible!**
- **However, progress not fast enough to reach Paris Agreement goals and SDGs**
- **Better-integrated sectors** - planning, policies and regulatory frameworks
- Systems approach: link **energy efficiency** and **renewable energy**
- Create a **level playing field** for renewables and decentralised off-grid renewables
- **Make all trends visible:** Much is happening, but data is not consolidated – renewables at local and sub-national level, distributed off-grid renewables, innovative business models
